SUMMARY

I'm a detail-oriented Computer Science undergraduate with a strong foundation in data structures, algorithms, and scalable backend development. I have hands-on experience building production-grade, data-driven applications using Python, JavaScript, and cloud-native technologies. Proficient in SQL, RESTful APIs, and real-time systems, I'm passionate about developing robust SaaS products that prioritize privacy and performance.

EDUCATION

PSIT Kanpur Bachelor of Technology, Information Technology CGPA: 7.5/10	(2022-2026)
Mother Teresa Mission Higher Secondary School 12th ISC; Percentage: 80.89	(2022)
Mother Teresa Mission Higher Secondary School 10th ICSE; Percentage: 90.25	(2020)

TECHNICAL SKILLS

- Programming Languages:** Java, Python, JavaScript, SQL
- Web & Backend Development:** Node.js, React.js, Express.js, Next.js, Django, Flask
- Databases:** MongoDB, Firebase, PostgreSQL, MySQL, Redis
- Version Control & Tools:** Git, GitHub, JIRA, Postman, Jenkins, Selenium
- Tools & Platforms:** Git, GitHub, Postman, JIRA, Jenkins, WebSocket
- Big Data & Systems:** GCP, AWS, Docker, Kubernetes, Terraform, Microservices

PROJECTS

- AI Voice Agent Interview Preparation Platform:** Developed a conversational AI platform to simulate real-world tech interviews using voice input/output. Integrated NLP-based question analysis, voice recognition APIs, and real-time feedback. Deployed using Python, React, and Flask with cloud-based scalability.
- AI-Powered Movie Recommendation System:** Engineered machine learning models for personalized movie recommendations. Built real-time seat booking and payment flow using Flask and AWS. Stored user interaction data for predictive insights.
- E-Commerce Platform:** Built a scalable web store with Stripe integration, JWT-based authentication, and modular backend using Express and MongoDB. Achieved 30% faster API responses with optimized queries.

EXPERIENCE

Independent Software Developer (2023 - Present)

- Developed 5+ full-stack applications, including an e-commerce platform and a decentralized crowdfunding system, improving user engagement by 40% through intuitive UI/UX.
- Built and deployed scalable web applications using MERN stack, AWS, and Kubernetes, reducing server response time by 30% with optimized API calls.

CERTIFICATIONS

- Back-End Development Certification - IIT Kanpur
- Software engineer intern certificate- Hacker rank
- Object Oriented Programming using Python-Infosys Springboard
- Node.js Certification - Infosys Springboard
- Database Management - Infosys Springboard
