

Summary

Computer Science undergraduate with hands-on experience in backend and full-stack development using Node.js, Express, MongoDB, and React. Built and deployed AI-powered voice apps and scalable REST APIs. Proficient in JavaScript, SQL, Git, and cloud platforms like Vercel and AWS. Certified in Node.js, DBMS, and JavaScript via Infosys Springboard. Driven to build real-world tech solutions and contribute to high-impact projects.

Education	
PSIT Kanpur	(2022-2026)
Bachelor of Technology, Information Technology; GPA: 7.56	
Mother Teresa Mission Higher Secondary School	(2021-2022)
12th ISC; Percentage: 75.89	
Mother Teresa Mission Higher Secondary School	(2019-2020)
10th ISC; Percentage: 89.89	

SKILLS

- Languages:** Java, Python, JavaScript, SQL
- Databases:** MongoDB, Firebase, PostgreSQL, MySQL, Redis
- Tools:** Git & GitHub, Postman, Clerk, Inngest
- Platforms:** Visual Studio Code, Jupiter Notebook, PyCharm, Vercel, Vapi
- Soft Skills:** Presentation, Active Listening, Team Collaboration, Client Engagement

WORK EXPERIENCE

Freelance Full Stack Developer

Remote | 2023 – Present

- Developed 5+ custom portfolio websites and admin dashboards for local businesses using React and Express.js, improving client visibility and user engagement by over 30%.
- Deployed applications via Render and Vercel, maintaining 99.9% uptime and reducing client hosting costs by up to 40%.
- Integrated secure admin logins and responsive UIs, and Implemented CMS functionality using MongoDB, leading to 50% faster content updates for clients.

Google Solution Challenge 2025 – Participant

Google Developer Student Clubs (GDSC)

- Chosen as one of around 200 teams worldwide to take part in Google’s competition to solve real-world problems using technology.
- Worked with a team of 4 people to design and launch a healthcare app aimed at helping over 1,000 users.
- Working on technologies like Firebase, Flutter, and Google Cloud Platform.

PROJECTS

AI-Mock Interview Preparation Platform | [LINK](#)

Jan 2025 – Mar 2025 | Tech: Next.js, Vapi.ai, OpenAI, Tailwind CSS, Framer Motion, Vercel

- Built an AI-based mock interview platform with real-time voice interaction using Vapi and OpenAI, completing over 200+ mock interview sessions during beta testing.
- Used speech synthesis and NLP to generate 50+ unique, role-specific questions with intelligent follow-ups.
- Deployed the app to Vercel and tested with early users to gather feedback and iterate features.

AI Finance Tracker | [LINK](#)

Mar 2025 – Apr 2025 | Tech: Vercel, Clerk, Inngest, Next.js

- Built a file upload & sharing platform with user authentication and cloud storage using Multer and MongoDB.
- Implemented secure download links, file previews, and interactive dashboards.
- Currently integrating search and role-based access control.

Hospital Management System

Mar 2025 – Present | Tech: Node.js, Express, MongoDB, React, Tailwind CSS

- Building a hospital management tool designed to handle 500+ patient records, appointment scheduling, doctor info, and billing in a single system.
- Expected to reduce manual data entry by 60%, saving admin teams 10+ hours/week through automation.
- Implemented secure role-based logins for 3 types of users (admin, doctor, patient) using JWT for protected routes and data access.

CERTIFICATES

Backend Developer – IIT Kanpur | [CERTIFICATION](#)

- Completed a certified course on backend fundamentals including REST API development, middleware handling, and database integration using Node.js and Express.

Software Engineer Intern – Hacker Rank | [CERTIFICATION](#)

- Completed a job simulation covering tasks like debugging, writing optimized code, and solving real-world software problems in a professional work environment.

Node.js – Infosys Springboard | [CERTIFICATION](#)

- Learned core concepts of Node.js including event-driven architecture, asynchronous programming, and module system.

Database Management – Infosys Springboard | [CERTIFICATION](#)

- Covered fundamentals of RDBMS and NoSQL databases including schema design, indexing, and query optimization.

AWS job Simulation - Forage | [CERTIFICATION](#)

- Participated in a virtual simulation mimicking real AWS cloud-related job tasks.

Java Script – Infosys Springboard | [CERTIFICATION](#)

- Mastered core JavaScript concepts like closures, ES6 syntax, DOM manipulation, and asynchronous behaviour.
